WORK EXPERIENCES

02.2023 - TO NOW   **Freelancer** (Full-stack developer)

Provision of software, IT consultancy and data processing.
Experience with web portal hosting and administration.
Ability to communicate with clients and team to achieve goals.

06.2022 - 01.2023   **Softíci s.r.o** (back-end developer)

I worked as the backend developer for **Softici .s.r.o.**
I created a web application for **JoyWood** with an integrated employee records system.
I extended my experiences with **REST API** by using **Guzzle HTTP** library on the **Flowii.com** to get data for website called **SunnyPower**.

WORK EXPERIENCES

Full-stack developer
Green hosting - Internal application for downloading data from Fio banka, logging activity and then sending a bank statement to a specific email.

Roller Details - Web application for players that helps and facilitates players in selecting game strategies.

Back-end developer
Sunny power - Internal web application for a solar panel company, downloading data from Rest Api and then publishing the offer for the partner.

JoyWood - Internal web application for recording employees at work and then sending PDF files to email with records of hours worked.
